## VIRTUAL LMI®

**The world's first and most comprehensive  
labor market information system**

Virtual LMI® is unique in its ability to seamlessly integrate labor market information. The system combines traditional and real-time labor market information, allowing users to easily review and compare labor market data and trends in their area. The data included in Virtual LMI® encompasses transactional data, including jobs and candidate data. This also includes cumulative data gathered from job postings and traditional surveyed labor market information.

# VIRTUAL LMI<sup>®</sup>
